Questions 16-20

Read the speech below carefully and answer the questions that follow.
Baca ucapan di bawah dan jawab soal-an-soalan yang berikutnya.

Good morning to all teachers and pupils.

Today I am going to talk about time management. Arranging your time is very important. It can help you to complete your tasks. It can also make your life more orderly. You will know when to do what. You will not be confused. You will also not waste your time doing unproductive things. One of the ways to arrange your time is by having a daily schedule.

In a schedule, there should be time allocated for exercising, relaxing, and studying. Too much studying will **dull your mind**. At the same time, relaxing for too long will make you lazy. Ask your parents or teachers to give you suggestions on your schedule. Once you have a schedule, you can go by the plan and focus on your work. However, we should also remember that we should not stick to the schedule too much and be too rigid.

I hope all of you will start to manage your time wisely. Thank you.

Read the following article and answer the questions that follow.

Oil palm was planted in Malaysia in the 1960s. Since then, Malaysia has become one of the leading palm oil producers in the world. Palm oil is extracted from the fruits of the oil palm.

The oil palm fruit is reddish-orange in colour. The fruits grow in bunches and there are about ten to fifteen bunches in a tree. Each bunch has about two hundred fruits. When they are ready to be harvested, the workers cut the bunches from the trees. Then, they take them to a factory in a truck. Here, the fruits are sterilized in a boiler and separated from the bunches. A machine then crushes the fruits to obtain crude palm oil. The crude oil is further processed until it becomes refined oil.

The oil is used for cooking as well as making other products such as margarine, soap, candles, and creamers.
